

# Gulani Vision Philosophy

*Dear Patient,*

*It is our pleasure to welcome you to our institute and we appreciate the trust you have placed in us for your vision needs.*

*It is Dr. Gulani's dedicated passion to work hard for each and every patient combining technology with individualized plans to customize vision to the best of his ability.*

*We are humbled by the superlatives that fellow physicians, patients and media have bestowed upon Dr. Gulani but at no point does he want that to be a presumption of superior skills or guarantees for outcomes. No surgery is perfect and every surgery can have side effects and complications.*

*He fondly says to all new patients at their first visit "Grill me with questions!"*

*It is an honor for us that our patients feel equally passionate about their vision results and experience here at our institute that they write testimonials and spread the word worldwide. None of them are paid or incentivized to do so.*

*We are not interested in luring any patient, hurtling them around and then placing them on a conveyer belt of surgery for financial incentives.*

*It is Dr. Gulani's philosophy to not operate on any patient until all of their questions are fully answered. Herewith he meets and sees you himself during your consultation, checks all of your measurements and after performing your surgery, follow ups and continues to see you personally.*

*Given the pride we carry in our work and personal touch, we want to always make sure that no patient is ever misled either in cost or expectations.*

*Dr. Gulani encourages you to call him anytime or email him with as many questions you may have and only after you are completely comfortable with the plan and prognosis, should you proceed.*

*The above information is to summarize your visit from today as well as to assure you regarding our intentions and welcome you to the Gulani Vision Family!*

*Thank you,*
